

Lightweight and portable, the MTB baby and toddler scale offers excellent value and versatility for pediatricians and other healthcare providers. With a capacity of 20kg, this scale boasts the flexibility to weigh newborn babies to toddlers on the same device. MTB features quick start-up and easy operation, so minimal training is needed. A cleverly designed ergonomic cradle locks securely in place and provides comfortable support for babies. The cradle removes easily to reveal a non-slip rubber mat underneath, simplifying the task of weighing toddlers. A memory function retains the most recent weight, allowing the user to record results after safely removing the child from the scale.
